SQL ERROR-version 2.6.2

Author:
AWBS

Created On: Sep 29 2007 05:54 PM

After upgrading to AWBS version 2.6.2, the following mysql query error is shown in the recent history when the updtransfers.php cron runs.

SQL ERROR-Query: SELECT active FROM
 module_types WHERE name='customreg' limit 1 Error: 1054:
 Unknown column 'active' in 'field list

SOLUTION: Download the v2.6.2 upgrade again, upload only the tools/updtransfers.php file to your AWBS site.
