Running windows server and get the following error when trying to email a customer;
Error in my_thread_global_end(): 2 threads didn't exit

This is a php bug, performing the following task usuauully clears up the problem:

Just go to the end of php.ini

Change:

[PHP_MYSQL]

extension=php_mysql.dll

to:

:[PHP_MYSQL]

;extension=php_mysql.dll

Then go to:

;extension=php_mysql.dll

and enable it:

extension=php_mysql.dll
